

Summer 2018 Library Outreach Program

# Mind-Blowing Matter Rocks!

Presented by...

**CHILDREN'S  
MUSEUM**  
of NEW HAMPSHIRE

**ABOUT:** Join us for an exploration of matter from tiny molecules to exploding volcanoes. Learn how rocks can change their state of matter and watch other items change right before your eyes! Observe startlingly science-filled experiments and demonstrations and make an incredible shrink paper craft-that will look like real glass-to take home!

A museum educator will lead children in a hands-on, exciting, and informative presentation-with a focus on geology and other subjects that ROCK! **This hour-long** program will wrap-up with every participant creating their own shrink-paper design-watching it transform its shape-seemingly by magic. Turn a STEM project into STEAM, by adding some ART!

## PRAISE FROM LAST YEAR'S "RIVER BUILDERS" PROGRAM:

*"Your whole program kept the children's attention! It was just the right mix of hands on & learning."*

*"Your presenter had excellent rapport with kids-it was great, both affordable and interesting."*

*"Your programs and presenters are upbeat, engaging and interesting as well as being very hands-on! I wouldn't change anything!"*

*"Your program held the kid's interest-there was no lag time-it was active and entertaining."*

*"Great balance between interaction and information. Our audience ranged from age five to grandparents and everyone was engaged and learned something."*

**Designed for Ages: 5-11, children outside this age range are welcome to attend**

**FEES:** \$210 per program, maximum enrollment of 50 children, includes all materials and travel within 20 miles round trip or our Dover location. Multiple sessions held consecutively in the same location will receive a \$50 discount on each additional session. A travel fee of 50 cents per mile will be required for libraries located beyond 20 miles round trip of the Museum's Dover location.

**\$20 off for libraries who are current members of the CMNH library pass membership program.**
